Allowable Subject Matter

Claims 1-4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: No prior art could be found, alone or in combination, to teach the claimed invention. In particular, no prior art could be found to teach the claimed dumping of the ARP cache, incrementing a counter for each of the second servers present in the ARP cache, and determining if a load imbalance exists by comparing the second servers' counters against one another. If a counter value surpasses a threshold, a message is sent regarding the load balance. In other words, no prior art could be found to teach the claimed steps of:

- preparing a first table containing, for each of said plurality of second servers, an address and a respective counter;
- dumping a copy of an address resolution protocol cache to a storage area to form a cache dump;
- determining, from said cache dump, which of said plurality of second servers are present in said cache dump and for each of said second servers present, incrementing a respective counter;
- after said determining and incrementing steps are completed, comparing said plurality of respective counters with each other to determine if a load

imbalance between said second servers is greater than a threshold value;

and

- if said load imbalance is greater than said threshold value, sending a message regarding said load imbalance.
